

Welcome

Quality – Responsibility – Efficiency

Agenda

1. Rothkötter Group: An introduction

2. Procurement requirements

1. Rothkötter Group: An introduction

Rothkötter Group:

An introduction

The Rothkötter Group is a family-owned company with headquarters and production sites in north-west Germany. The group focuses on the production of pig feed for the free market and the production of broiler chickens within the framework of vertical integration. This means that in the broiler chicken sector, the company handles the entire production process from parent stock rearing to the finished product and is the largest producer of chicken meat in Germany.

The group includes the three Rothkötter mixed feed plants in Meppen, Haren and Boizenburg, the Emsland hatchery in Dohren and the two chicken processing plants Emsland Frischgeflügel in Haren and Celler Land Frischgeflügel in Wietze. The sales company Landgeflügel is responsible for the distribution and logistics of fresh and frozen chicken meat products.

Vertical integration

Quality & efficiency
optimisation across
all stages

2. Procurement requirements

1. Packaging materials

Cardboard boxes made of solid board and corrugated cardboard

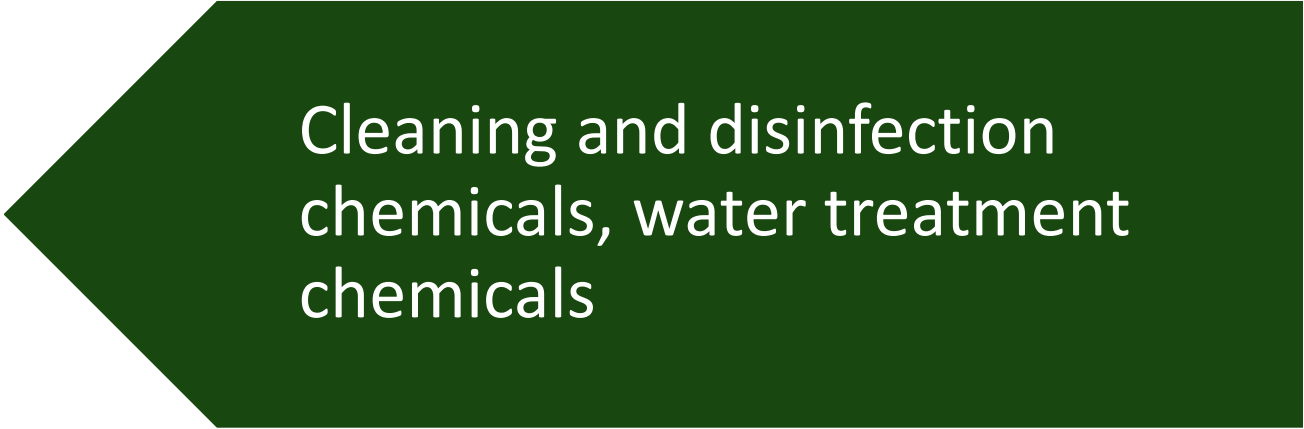

Polypropylene trays with and without suction pads, different sizes

Top films made of OPP/CPP (oriented polypropylene/cast polypropylene) in several dimensions, printed in private label
